## PRESENTATION

Hello. My name is Joan Mansito, but most colleagues call me "Mansit".

After learning to code by myself, I started in the tech industry in 2006 and have been working tech jobs since. Several roles, several projects, several companies, several technologies.

From my experience, I've come to develop a strong set of work ethics:

- ▶ Do whatever is necessary.
- ▶ Challenge everything all the time.
- ▶ Technology shapes the world.
- ▶ Transparency is the path to trust.
- ▶ Keep learning non-stop.
- ▶ Do it right or do it not.

If these core values seem agreeable to you, please read on to learn about my past and present roles, projects, companies, and techs.
