PRESENTATION

Hello. My name is Joan Mansito, but most colleagues call me "Mansit".

After learning to code by myself, I started in the tech industry in 2006 and have been working tech jobs since. Several roles, several projects, several companies, several technologies.

From my experience, I've come to develop a strong set of convictions:

- Do whatever is necessary.
- Challenge everything all the time.
- It's a journey for all of us.
- Transparency is the path to trust.
- Constantly reinvent yourself.
- Do it right or do it not.

If these core values seem agreeable to you, please read on to learn about what I've been up to these years around:

RELEVANT CARREER & ACHIEVEMENTS
